Price on Request

Enviropeat™ Spill Kits are indispensable on farms, in Service stations, manufacturing plants, on industrial and mining sites, and also in the transportation industry - in fact, anywhere there's oil, hydraulic fluid, chemicals, diesel and fuel.

Enviropeat™ is a non-toxic all natural 100% organic industrial absorbent that is economical, non-leaching and in its natural state, is already bio-degraded.

Due to the contaminants involved in spills and the variation in local regulations, the manufacturer cannot recommend disposal procedures or guarantee specific performance of enviropeat. The manufacturer disclaims any liability for any loss or damage incurred in connection with the use of the product.
